Nov. 23, 1993

My dear Harold Weisberg:

I wrote you some time ago about a tape recording, possibly made by Harry Holmes during the last interrogation session of Lee Oswald. You replied that I may be in error.

The obvious way of introduction is.

I just finished reading Gerald Posner's Case Closed.

In the acknowledgment section he states he was a house guest of yours while collecting materials for Case Closed. He also states he had free access to your files of government documents. He also cites Post Mortem in his bibliography.

Okay! How could he have missed the government documents you display on pages 308-310 in Post Mortem

Case Closed is obviously what you have called Whitewash. He does not deal with the autopsy findings in the Warren Report. He defends the single bullet theory using computer and technology he alleges did not exist in

1964. It was also not available to the later Congressional inquiry in pursuit of an answer to "Who Killed Kennedy?"

Are the documents you display forgeries. Are the signatures they bear of Mr. Buckley fakes.

If not, Gerald Posner is a dishonest man.

Please indulge an "almost" centenarian with a reply. I am still wide awake and around.

Sincerely,

Joseph Schneider
